The Office Action restricts the present invention into six groups. Applicant hereby confirms its election of group I without traverse.

DOUBLE PATENTING

The Office Action rejects the claims under the judicially created doctrine of obvious-type double patenting as being unpatentable over claims 1-20 of copending Application No. 11/034,478; and Claims 1-13 and 30 over U.S. Pat. No. 6,797,688. Application No. 11/034,478 is a continuation application of U.S. Pat. No. 6,939,844, which is in turn is a continuation of U.S. Pat. No. 6,797,688. As such, U.S. Pat. No. 6,797,688 and Application No. 11/034,478 share the same specification.

Applicants respectfully traverse this rejection. Claim 1, as now amended, requires a molecular weight range of starch component of from about 2,000,000 to about 10,000,000. No such limitation is found in the claims of the cited references. Moreover, the cited references disclose, at best, a molecular weight of 1,000,000. *See e.g.*, U.S. Pat. No. 6,797,688 at column 3, lines 9-13. In view of the foregoing, the double patenting rejection is traversed.

The Office Action rejects the claims over EP 596,580 under 35 USC §§ 102 & 103.
